

Installation of a Safety Cap Kit

Included in the kit:

- Safety Cap
- 5 feet of wire
- 2 clips for fastening the wire to the cap
- 2 clips for fastening the wire to piping
- 2 screws

Installation of the Safety Cap:

1. Remove the 2 screws that hold the guide arm to the existing cap.
2. Replace the cap with the safety cap and secure using supplied screws.
3. Secure the wire with 2 clamps as shown.
